ASX ANNOUNCEMENT

ISSUE OF CLEANSING NOTICE UNDER SECTION 708A(5) OF THE CORPORATIONS ACT

This notice is given by the Company under section 708A(5)(e) of the Corporations Act in relation to the issue of 5,000,000 fully paid ordinary shares on conversion of the equivalent number of options issued under its employee share option plan without disclosure to investors under Part 6D.2 of the Corporations Act.

As at the date of this notice, the Company has complied with:

- a) The provisions of Chapter 2M of the Corporations Act as they apply to the Company, and
- b) Section 674 of the Corporations Act.

The Company confirms that, as at the date of this notice, there is no information that:

- a) Has been “excluded information” (as defined in sections 708A(7) and 708A(8) of the Corporations Act) to be disclosed under section 708A(6)(e) of the Corporations Act.

This has been authorized by the Board of Painchek Limited.

About PainChek®

PainChek® Ltd is an Australian based company that develops pain assessment technologies.

PainChek® is a smart phone based medical device using artificial intelligence to assess and score pain levels in real time and update medical records in the cloud. PainChek® records a short video of the person’s face and analyses the images that indicate pain and records them.

Next, the caregiver uses PainChek® to record their observations of other pain related behaviours that complete the assessment. Finally, PainChek® calculates an overall pain score and stores the result allowing the caregiver to monitor the effect of medication and treatment over time.

PainChek® is being rolled out globally in two phases: first, PainChek® for adults who are unable to effectively verbalise their pain such as people with dementia, and second, PainChek® for Children who have not yet learnt to speak.

The PainChek® Shared Care Program is a PainChek® licensing model which enables a professional carer to share their resident or patient data securely with other healthcare professionals or designated homebased family carers for ongoing pain assessments or clinical data review.
