CHESS REPLACEMENT PROJECT UPDATE – CONFIRMATION OF DELAY TO APRIL 2023 GO-LIVE

ASX is today providing a CHES replacement project update to CHES users, software providers and other stakeholders.

On 28 March 2022, ASX advised the market about changes to the CHES application software release schedule and indicated there was a strong likelihood that the April 2023 go-live date would change.

ASX now confirms that April 2023 for go-live is no longer viable. This decision reflects the delay to the remaining delivery of application software, which no longer gives ASX and CHES users the time allocated to complete their testing and other readiness activities before April 2023.

A new go-live date will be determined after further planning with ASX's technology partner and input from stakeholders on the timing of project milestones, including industry testing, operational readiness, market dress rehearsals and implementation.

ASX's priority remains to deliver CHES replacement in a manner that balances safety and efficiency. Ongoing engagement with the industry is a vital ingredient. The existing CHES system remains robust and continues to perform well in the meantime.

The project update is available [here](#).
