About Close the Loop Group

With locations across Australia, Europe, South Africa and the United States, Close the Loop create innovative products and packaging that includes recyclable and made-from recycled content, as well as collect, sort, reclaim and reuse resources that would otherwise go to landfill. From recovering print consumables, eyewear, cosmetics, and phone cases, through-to the reusing of toner and post-consumer soft plastics for an asphalt additive, the Group is focused on the future, sustainability and the circular economy.

Well positioned within the circular economy, Close the Loop consists of the merging of two secondary business groups - Close the Loop and O F Pack. The combining of these two entities allows for end-to-end solutions across packaging and consumables to a variety of markets, with advanced innovation in product development, as well as end of life take-back and recovery systems for complex waste streams to greatly reduce waste to landfill.
