

CORPORATE UPDATE WEBINAR

AML3D (ASX:AL3), a global provider of large-scale metal additive manufacturing technology and solutions, will be providing a corporate update webinar for shareholders and investors on 14 April 2022.

AML3D's Managing Director, Andrew Sales, will provide an overview of the Company's significant progress to become a technology enabled, disruptor of the metal manufacturing industry. On the webinar, Andrew will explain the advantages of AML3D's proprietary wire additive manufacturing (WAM) technology along with their growth plans targeting applications in the Oil & Gas, Automotive, Aerospace and Defence sectors.

The webinar will commence at 1 pm (ACST) on Thursday, 14 April 2022. All shareholders and investors are welcome to attend, with registration via the address below:

About AML3D Limited

AML3D Limited, a publicly listed technology company founded in 2014, utilises new technologies to pioneer and lead metal additive manufacturing globally. Disrupting the traditional manufacturing space, AML3D has developed and patented a Wire Additive Manufacturing (WAM®) process that metal 3D prints commercial, large-scale parts for Aerospace, Defence, Maritime, Manufacturing, Mining and Oil & Gas. AML3D provides parts contract manufacturing from its Technology Centre in Adelaide, Australia, and is the OEM of ARCEMY®, an industrial metal 3D printing system that combines IIoT and Industry 4.0 to enable manufacturers to become globally competitive.
