

Diamond Drilling Resumes at Brandy Hill South

Key Highlights

- **Diamond drilling resumes at Brandy Hill South**
- **An alternative approach road has allowed access to the drill site**

Recharge Metals Limited (ASX: REC, Recharge or the Company) is pleased to announce that drilling operations at the Brandy Hill South Project has resumed. The Project is located within the Archaean Gullewa Greenstone Belt within the Murchison Province, Yilgarn Craton.

Drilling was suspended on the 5th of April because rain events caused surface wetness and pooling of water in certain areas along tracks at Mellenbye Station preventing access to the drilling area. This resulted in drill hole BHRCD018, the second of three diamond holes, not being accessible. Drilling commenced on BHRCD018 on 19 March and the hole is at a current depth of 210m.

Next Steps at Brandy Hill South

- Completion of diamond tails on drillholes BHRCD018 and BHRCD023
- Completion of downhole electromagnetic (DHEM) surveying, and
- Detailed logging and analysis of all drill core before being submitted to the laboratory for analysis

This announcement has been authorised for release by the board.

Competent Person Statement

The information in this announcement that relates to Exploration Results is based on information compiled and fairly represented by Mr Brett Wallace, Managing Director of Recharge Metals Ltd, who is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM). Mr Wallace has sufficient experience relevant to the style of mineralisation and type of deposit under consideration, and to the activity which he has undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Wallace consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the Exploration Results information included in this report from previous Company announcements, including Exploration Results extracted from the Company's Prospectus announced to the ASX on 7 October 2021 and the Company's subsequent ASX announcements of 15 November 2021, 8 February 2022, 29 March 2022, 5 April 2022 and 13 April 2022.
