Orientation Drilling Programme Completed at Issia Gold Project in Cote d'Ivoire

Perth-based uranium and gold explorer Haranga Resources (ASX:HAR; "Haranga" or "the Company") has successfully completed an Orientation Air Core (AC) drilling programme at the Issia Gold Project in Cote d'Ivoire.

This is the first ever drilling campaign carried out over the Issia Project area and technically provides a strong basis for ongoing drilling.

The programme of approximately 2,000 metres of AC drilling in 52 holes was conducted in November 2021 over the Noukpoudou Shear-Zone, in accessible areas along forestry tracks in proximity to historical anomalous gold soil geochemistry. The aim of the orientation drilling was to determine the suitability of AC drilling over the project area, to survey the depth of weathering and the regolith profile, and to understand the relationship between the historical soil sampling results and the underlying lithologies.

Drilling confirmed a surface lateritic cover down to approximately 10 metres followed by a weathered saprolite profile down to approximately 40 metres.

Mineralisation was limited to some visual sulphides with no anomalous gold results reported.

A review of the soil geochemistry methodology and the relationship of the results to the broader project geology at Issia is being undertaken which will guide ongoing exploration and drilling programmes.

In addition, Haranga have completed further infill soil sampling over the Abujar Shear-Zone in the north-western portion of the Saraya licence area, where previously reported historical soil sampling (ASX:HAR 8 March 2022) yielded gold anomalous results. This portion of the licence area remains untested by drilling. Notably, the Abujar shear-zone hosts the 3.35M ounce Abujar Gold Deposit¹ ("ASX: TIE") fifty kilometres to the north-east. Subject to the pending soil sampling results the Company plans to rapidly execute a drill programme to test the Abujar Shear-Zone.

Competent Person's and Compliance Statement

The information in this announcement that relates to Exploration Results is based on and fairly represents information and supporting documentation compiled by Mr Jean Kaisin working in consultation with Consulting Geologist Mr John Davis, a competent person who is a Member of The Australasian Institute of Geoscientists (M AIG). Mr Davis has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code"). Mr Davis is the Non-Executive Director of Haranga Resources Limited and consents to the inclusion in this announcement of the Exploration Results in the form and context in which they appear. Mr Kaisin is a full-time employee of Haranga Resources Limited.

The forward-looking statements in this announcement are based on the Company's current expectations about future events. They are, however, subject to known and unknown risks, uncertainties and assumptions, many of which are outside the control of the Company and its Directors, which could cause actual results, performance or achievements to differ materially from future results, performance or achievements expressed or implied by the forward-looking statements in this announcement. Forward looking statements generally (but not always) include those containing words such as 'anticipate', 'estimates', 'should', 'will', 'expects', 'plans' or similar expressions.

About Haranga

Haranga Resources holds a uranium project in Senegal and interests in a range of gold projects located in Cote d'Ivoire and Burkina Faso, with a total of six tenements covering an area of 3,074km².

The Company has mapped out a two-year exploration and development budget for its key projects, namely the Saraya Uranium project in Senegal and the Issia Gold Project in Cote d'Ivoire. This exploration and development budget is inclusive of all requirements through to resource estimation. In addition, there is budget allocation for early-stage exploration programs for the Burkina Faso assets, while the Company will continue to identify and assess additional acquisition targets across the West African region.

Haranga's collective expertise includes considerable experience running ASX-listed companies, and financing and developing mining and exploration projects in Africa, Australia, and other parts of the world.
