A copy of the video conference will also be made available on New Century's website at www.newcenturyresources.com.

This announcement is approved for release by the Managing Director of New Century.

About New Century Resources Limited

Established in 2017, New Century is a leading mining, tailings management and economic rehabilitation company focused on sustainably producing metal from resource assets while rehabilitating legacy impacts to the environment. New Century is a top-15 global zinc producer, operating Australia's largest hydraulic mine at the Century Mine in Queensland; extracting, processing, and marketing zinc recovered from historical tailings.

New Century is also actively progressing organic growth opportunities through in-situ projects at the Century Mine and is exploring the potential to restart copper production at the historically significant Mt Lyell Mine in Tasmania using 100% renewable energy.

In addition, New Century is pursuing opportunities with industry peers to reprocess and rehabilitate contemporary and historical mineralised waste assets at operational and legacy mine sites. Under this model, New Century may employ its expertise in economic rehabilitation with partners to the benefit of shareholders and the environment.
