

Advanced Human Imaging Announces Resignation of Director

Advanced Human Imaging Ltd (ASX, NASDAQ: **AHI**) announces that Mr Edward Greissing Jr has resigned from the Board of Directors, with effect from 26 May 2022.

On behalf of the Board, Non-Executive Chairman, Mr Nicholas Prosser, “thanked Mr Greissing for his service to AHI and wished him well in his future endeavours”.

AHI is currently in discussion with two new Board appointments and will look to finalise a minimum of one new appointment in the coming weeks.

About Advanced Human Imaging:

AHI has developed and patented a proprietary dimensioning technology that enables our partners and their users to check, track, and assess their vital signs and dimensions using only a smartphone both privately and accurately.

Our goal is to assist our partners by empowering their consumers with this capability. This in return gives our partners the ability to assess, assist, and communicate outcomes with their consumers when navigating day to day life and the ongoing fight against chronic disease which accounts for 86% of global healthcare costs.

Whether this is a personal journey to better health, understanding the risk associated with physical condition, tracking the changes they are experiencing through training, dieting, or under medical regimes, or simply wanting to be correctly sized for a garment when shopping online. The AHI technology delivers this seamlessly, privately, and cost-effectively in only a few minutes.

Our partner benefits from our software as a service pricing solution, that reduces with scale. Integration is made easy with the AHI modular system, based on multiple software development kits (SDKs), allowing a partner to select the functions, measurements, and displays to suit their individual needs.

AHI has developed this capability by leveraging the power of Computer Vision, Machine Learning, and patented algorithms, to process these images on secure, enterprise-level infrastructure, delivering an end-to-end experience that is unrivalled in the industry. AHI simplifies the collection of measurements and removes the human error present in traditional methods.
