

ASX Announcement

28 April 2021

UPCOMING DRILLING PROGRAM AT MONUMENT GOLD PROJECT

Si6 Metals Limited (ASX: Si6 or the Company) is pleased to report that it has been successful in its application for co-funded exploration drilling through the Department of Mines, Industry, Regulation and Safety (DMIRS) Exploration Incentive Scheme (EIS) program where DMIRS offers a 50% refund of some direct drilling costs for innovative drilling projects.

The funds will be allocated to a multi-hole, regional air core (AC) drilling program targeting bulk-tonnage, **syenite-hosted gold mineralisation** within the 310sqkm tenement package located within the Laverton Tectonic Zone (LTZ). Within the LTZ, there are a number of **syenite related gold deposits including Wallaby (~7 million ounces), Jupiter (~1.5million ounces), Calistro and Cameron Well.**

A recent analysis of the aeromagnetic imagery across the Monument Gold Project (MGP) has identified at least **60 high-level felsic intrusive targets** with priority targets to be tested with an **upcoming 5,000m AC drilling program**. This will be the first exploration drilling program of this type to be undertaken within the MGP with **drilling expected to commence in June.**

Regional soil sampling has also been completed along the Korong-Waihi Corridor and near the Mt Morgans Mining Centre in the south of the MGP area with approximately 900 sample submitted to ALS laboratories in Perth for gold and multi-element analysis. The soil sampling is part of a broader regional exploration strategy aimed at delineating a continued pipeline of exploration targets. **Results are expected in May.**

This announcement has been approved for release by the Executive Chairman of Si6 Metals Ltd, Mr Patrick Holywell.
