WORLEY LIMITED (WORLEY)

(ASX: WOR)

Heartwell Renewables LLC awards a services contract for a renewable diesel plant

Worley has been awarded a contract by Heartwell Renewables LLC (Heartwell), a joint venture between The Love's Family of Companies and Cargill, for the detailed and field engineering services for a greenfield renewable diesel plant in Hastings, Nebraska.

The new plant will produce an estimated 302 million litres of renewable diesel per year from feedstocks such as vegetable oils and tallow. This renewable diesel can be used as a drop-in fuel in diesel-powered vehicles without any engine modifications.

Worley's services will be executed in Houston, Texas with support from our Global Integrated Delivery team in India. The team will use a full suite of digital tools during project delivery.

"We look forward to working with Heartwell on this important contract that will contribute to our purpose of delivering a more sustainable world," said Chris Ashton, Chief Executive Officer of Worley.

Authorized for release by Nuala O'Leary, Group Company Secretary.
